Thank you for your support!

Dear Company Representative,

On behalf of the American Society of Mechanical Engineers (ASME) at the University of California, Irvine (UCI), we would like to extend our heartfelt gratitude for your interest in sponsoring our student organization.

Our mission is to create opportunities for students to build meaningful connections, develop their professional skills, and succeed in their careers. By alleviating the challenges of finding support and networking, we empower our members to excel academically and professionally.

Once again, thank you for considering sponsorship of ASME at UCI. We are eager to collaborate and would be delighted to discuss how we can work together.

Sincerely,

ASME at UCI President (2026 - 2027)

Where You Make An Impact

Contributions will allow ASME to continue providing networking and professional development opportunities to all students and ensure well executed events. While dollars make it happen, donations of any form are accepted, engineering supplies and food being great examples!

Promote Campus Involvement!

SENIOR DESIGN NETWORKING NIGHT

Our largest annual event draws 300+ attendees to explore 10+ student-run engineering capstone projects. ASME at UCI provides a platform for teams to showcase their work, share progress, and recruit talent, while attendees network directly with project leaders to foster collaboration and innovation.

Your support ensures the continued success of this impactful event, empowering the next generation of engineers.

Where You Make An Impact

Promote Campus Involvement!

NETWORK WITH ASME

Network with ASME allows students to network with industry professionals from the aerospace, biotech, simulation software, and automotive industries. It is a banquet-style dinner networking event where attendees have the opportunity to learn about the lives and efforts of company representatives while also establishing important connections in the process.

Your support allows us to continue to host an event where students are able to learn about life in industry and explore possible career options.

RESEARCH NETWORKING NIGHT

Our Research Networking Night brings students together with professors and graduate students to explore cutting-edge research happening on campus. Attendees can learn about research topics, current progress, and opportunities to get involved, while building valuable connections with academic leaders.

Your support helps us create an engaging space for students to discover research opportunities, gain insights, and foster a passion for innovation.

Where You Make An Impact

Professional Development!

At ASME at UCI, we connect the mechanical engineering community with industry leaders to foster professional growth and career exploration.

COMPANY INFO SESSIONS

Engage directly with UCI's mechanical engineering students by hosting info sessions to showcase your company's opportunities and culture. These sessions are an excellent way to build your presence on campus—no donations or monetary contributions required!

PROFESSIONAL WORKSHOPS

Help students succeed by sharing your expertise. By leading workshops on topics like resumes, career fair preparation, networking, and more, your representatives can provide students with valuable insights and tools for entering the workforce.

COMPANY TOURS

Inspire future engineers with first-hand experiences. Host a tour of your facilities to give students a behind-the-scenes look at real-world engineering and your company's daily operations. These tours help students explore potential career paths while strengthening their connection to your industry.

Where You Make An Impact

Empower Future Engineers!

ASME at UCI is committed to fostering a passion for engineering while supporting students' academic and professional growth.

OUTREACH

Inspire the next generation of engineers by funding robot building kits for local middle and high school students. These kits introduce students to engineering concepts in an engaging way, sparking their curiosity about STEM fields. Your support helps ignite a lifelong passion for innovation and problem-solving.

MENTORSHIP

Help us guide new students toward success. Our mentorship program connects experienced upperclassmen with new students to provide academic guidance, study strategies, and career advice. Your contributions help us create a supportive community that empowers students in their academic and professional journeys.

INTERNS

Support leadership development by contributing to our board intern program. This program allows motivated students to gain hands-on experience by shadowing ASME board directors, and developing time management, leadership, and communication skills. Your involvement helps grow confident and capable engineers.

Where You Make An Impact

Sponsor our PeterWorks (SolidWorks) Program!

PETERWORKS PROGRAM

PeterWorks, ASME at UCI's newest program, offers a welcoming space for new engineering students to develop fundamental CAD and fabrication skills. Through biweekly SolidWorks lessons and a quarter-long drone-building competition, students explore the entire engineering design process—from brainstorming and prototyping to testing and calibration.

PROGRAM OBJECTIVES

- Teach SolidWorks fundamentals and best practices
- Foster teamwork and collaboration
- Prepare students for Certified SolidWorks Associate (CSWA) exam
- Provide manufacturing and design experience
- Emphasize the importance of CAD in industry

WITH YOUR SUPPORT!

To fund this program, we need your help! Your support in covering material, manufacturing and lecture costs allows our club to offer this program to students free of charge, eliminating financial barriers. With your donation, you can help sustain this program for years to come and build foundational skills for the next generation of engineers.

ETHAN SERVIN
Statics Lead

Where You Make An Impact

Sponsor our HPVC Program!

Human Powered Vehicle Competition (HPVC)

The "Human Powered Vehicle Competition" (HPVC) challenges students to design, build, and test a human-powered vehicle. The vehicle is used to compete in drag and endurance races that put its speed and durability to the test. This interdisciplinary engineering design project allows students to apply their engineering skills in a real-world setting, fostering innovation while competing against other collegiate teams.

HANDS-ON EXPERIENCE

HPVC offers students the opportunity to lead every stage of the engineering process—from design to manufacturing to testing. Members develop key technical and professional skills required to become well-rounded engineers including 3D Printing, CAD modeling, machining, communication and problem-solving.

WITH YOUR SUPPORT!

Sponsorship is crucial to the success of HPVC. Contributions from sponsors enable our team to take on the engineering challenges of designing and manufacturing a competitive vehicle. Funds will go directly towards the material procurement, manufacturing processes, and the sustainment of the project, ensuring a sustainable yearly development cycle.

Benefits of Sponsorship

Sponsorship Tiers!

As a 501(c)(3) non-profit organization, donating to ASME at UCI is simple and mutually beneficial. Sponsorships allow us to excel as one of the largest engineering organizations on campus without charging membership dues or other prohibitive fees to students who seek to join, and in return, your company will be exposed to hundreds of engineering students who are excited to learn about the company's opportunities and show you what they are capable of. The table below outlines the sponsorship tiers we offer and the associated benefits that come with each tier. Please do not hesitate to contact us with any questions!

Benefits	Bronze \$500+	Silver \$1000+	Gold \$2000+
Advertisements on jobs/internships on weekly newsletter			
One in-person info session/seminar			
Gift bag and thank you letter			
Company Logo on Website and Sponsored Events			
Access to ASME at UCI Resume Book			
Solo Advertisements on ASME Discord, Instagram, and Email			
Donation to HPVC will have company logo on project/bike for EFx competition	Small Decal	Medium Decal	Large Decal
Additional Company Sessions/Events Pre-Scheduled			

Donating to ASME at UCI

We accept all forms of donations!

Partnering with ASME at UCI is a meaningful way to support the next generation of mechanical engineers while showcasing your company's leadership in the field. Together, we can inspire future innovators, foster student development, and shape the future of engineering. Join us in making a lasting difference!

MONETARY DONATIONS

Please fill out the provided Google Form for monetary donations. Payment methods will be addressed in the form. Contact us at asme@uci.edu for any questions!

ASME SPONSORSHIP FORM

IN-KIND CONTRIBUTIONS

We welcome all forms of donations to support our engineering club's activities and growth.

Examples of General ASME donations:

- Food/snacks for events
- Engineering supplies (examples provided below)

Examples of PeterWorks donations:

- Wood sheets (Ex. Italian Poplar and Baltic birch)
- 3D printer filament (PLA and TPU 95)
- Spray paint

Examples of HPVC donations:

- Aluminum tubing
- 3D printer filament

ASME@UCI.EDU
FOR DETAILS

ASME TECHNICAL CONFERENCES

ASME technical conferences are held year-round, with many events occurring between late spring and late summer. These are deep-dive industry events focused on particular engineering disciplines, such as manufacturing, aerospace, ocean engineering, etc. They allow companies to connect with students who have a specific interest and high technical competency in the company's industry, giving these students a way to gain exposure to emerging industrial applications and technologies within their field of interest.

Through your donations, we could enable more students to attend these conferences by covering registration fees and any necessary travel fees.
